## HUNTRESS MANAGED ENDPOINT DETECTION & RESPONSE (EDR)

All company computers are protected by the Huntress EDR platform and a 24/7 human-led Security Operations Centre. In the event of a critical breach, Huntress immediately isolates the affected endpoint and works with All IT engineers to remediate threats.

## ALL IT SECURITY BASELINE PROGRAM - DEVICE

The All IT Security Baseline Device component aligns with CIS Controls and includes full management of Microsoft Defender – the more traditional device security component (think advanced antivirus). It also covers extensive controls and policy management to ensure devices are secured, tracked and monitored.

Our baseline security undergoes major changes 4 times a year, with hundreds of minor revisions in between.

All IT keeps your business secure, connected, and efficient with 24/7 IT support, cybersecurity, cloud, and telephony—fast, reliable solutions that drive growth. Call 1300 425 548 or visit [www.allitservices.com.au](http://www.allitservices.com.au)

## REMOTE MANAGEMENT & MONITORING

This component keeps track of all devices from an inventory standpoint while monitoring Application and Operating System updates. Outdated applications and system vulnerabilities are the second-largest threat vector for organisations – this platform helps manage and report these risks to our engineers.
